THIS IS UNEVALUATED INFORMATION 1. Two former German submaries were moved in the fittin pout lasin of the Chisnov chiques were submaried and the chistory of the Chisnov chiques and submaried submaried and the chistory chiques and submaried subma	PLACE ACQUIRED			(LISTED BELOW)
THIS IS UNEVALUATED INFORMATION 1. Two forwar German submarrines were moored in the fittin —out lasin of the Zhdanov Shipyard in Leningral, Engine fitters were seen aboard at times, Colding and riveting work was done there. The boats seemed to be large vossels, He armanent was observed. 2. Two large warships were moored leside the part at the end of 1/h/7, with shipyard personnel working aboard, Pacy had the enveringeed twin turnets forward, with runs of between 30 and 100 mm caliber, and one or two cimilar turnets aft. They also carried turnets with Single guns which were arranged enough the forward and other with lateral shields and totaled between 12 and 2h. Heavy and 11/ht in guns were nounted in a number of places, Four-hardled 20-mm guns were also observed. On each side of the ship work two shields to other works at little about the beam of the formard funnel and the other zore toward the sterm. The sterm of one of the number of places, Four-hardled 20-mm guns were also observed. On each side of the ship work two shields to other constitute the sterm. The sterm of one of the number was curved down toward the water surface. Asits fitted on deck ran as far as the curved slope. On these rails were minor, ephorical bedies with lead horne, and 1 motor in diameter. * 3. Long slender motorboots, between 2) and 30 meters long, with helf—sunk wheelhouses were sanctions lying in the fitting-out lasts. ** *** *** *** *** *** *** ***	NFO.		64 1.23 1; 1.24 8	
of the Shdanov Shigyard in Leningrad, Engine fitters were seen aboard at times, Solding and riveting work was done there. The boats seemed to be large vessels, No aracunt was observed. 2. Two large warships were moored beside the yard at the end of 17h7, with shigyard personnel working aboard. They had two caparitypeed twin turnets formard, with pass of between 30 and 100 mm caliber, and one or two cimilar turrets aft. They also carried turrets with single game shich were arranged around the forw rd and after funnel near the supercructures, hose game were of 7m a caliber with lateral shields and totaled between 12 and 21. Neavy and light in game were also observed. On each side of the ship were two single torpade tubes, one a little abaft the beam of the forward funnel and the atter more toward the stern. The stern of one of the runions was curved done toward the veter surface. Asis fitted on deck ran as far as the curved slope. In these rails were minor, spherical bodies with lead horms, and 1 meter in diameter. * 3. Long, slender motorbosts, between 2) and 30 meters long, with half—sunk wheelhouses were specified by the fitting-out lasin. ** ** ** ** ** ** ** ** ** **	OF THE BRITED OF ITS CONTINT	BTATES BR.
